## FEATURED PROJECTS

### HIV Surveillance Data Analyst | Centers for Disease Control and Prevention (CDC), Lilongwe, Malawi

RWD provides The Centers for Disease Control with partner coordination and communication, data management, analysis and dissemination of information in support of the Division of Global HIV (DGHT) including the planning, training, and implementation of HIV surveillance studies targeting pregnant women at designated sites. Our work in Malawi includes monitoring and implementation of national program evaluations, review inputs and results of the HIV modeling activities using geospatial, survey, and program data. We also provide technical assistance for various specimen transport, ensure compliance with laboratory accreditation efforts, and participate in monthly laboratory technical working groups (TWGs). Additional support includes:

- HIV diagnostics and treatment monitoring scale up in PEPFAR supported laboratories
- Laboratory system strengthening, including quality management systems
- Improvement of laboratory information management systems and sample transportation systems
- Partner management implementation and technical assistance
- COVID-19 diagnostics for the government of Malawi's pandemic response
